**FREEDOM OF INFORMATION ACT 2000 - Ref: FOI/011793**

With reference to your FOI request in connection with 'Costings for prosthetics,dialysis and cardiac conditions' please see response below.

**The cost of prosthetic's work for the group this should include a total cost for work with all that the group contract to. this should including private work.  
the average cost of work per patient  
the cost of a single given high activity prostic leg  
the cost of a recast for a socket (this can be given as a average ~)  
the cost of remaking a socket (this can be given as an average )  
how many patients get there work paid for private work  
how many people get there prostics paid for under the IFR**

**also I would like the cost of dialysis for people with diabetes  
and the cost of a diabetic on the group per year  
this should be given with out the cost of dialysis added to the individual**

**the cost to the group of a unfit diabetic patient  
the cost of treating cardiac condition per person / hart bypass/hart failure / cardiac arrest  
the cost of treating a person with failing eye site  
the cost of a lower leg removal and the care that comes with this and all off the above**

Regarding your request above, The Trust is able to provide the following information on amputees using the NHS tariffs for 2014/15 -

Amputation with major complications & co-morbidities £14548

Amputation without complications £7534

Foot procedures for diabetes or arterial disease and procedures to amputation stumps £2226.

With regard to prosthetics, all work for Dudley patients is carried out by Royal Wolverhampton hospital at the Maltings amputee service, so no costs at Dudley group.

The Trust does not record activity on general conditions so unable to answer questions on diabetes, cardiac conditions or failing sight etc.

However a medic at the Trust did do an audit on diabetes treatment, please see attached a previous Freedom of Information response reference 011564 to this.
