Supporting our patients' journey back to recovery

Rehabilitation restores both health and well-being after surgery or an illness. It may be adjusting to a new way of life, managing pain or even learning to walk again. Whatever the journey, we help our patients to aim towards a better quality of life.

### *The appeal will enable us to:*

- purchase specialist equipment which will help our staff to treat people in our hospitals and in the community;
- provide therapy for those who have experienced stroke, heart attack, spinal cord injury, etc. so they can regain a better quality of life;
- help our patients to have a better understanding of their recovery journey to enable them to move forward independently with confidence.

“We know that physical rehabilitation is not the whole story. Injuries and medical conditions will have a profound effect of emotional well-being and close relationships. By treating all of our patients’ needs we can make sure they are equipped for the emotional, as well as the physical, challenges of their recovery”
